(859) 622-1145

Mission

The mission of the College of Health Sciences is to prepare outstanding health and human service professionals and leaders who contribute to the success and vitality of their communities, the Commonwealth, and the world.

Vision

The College of Health Sciences will be the premier college that shapes and improves health and well-being, advancing Kentucky and impacting the world!

Core Values

We stand united and committed to student success. This is demonstrated through equitable and inclusive behavior. The **values** that guide our behavior include:

- **TRUST** - A team climate of respect in which people are comfortable being themselves.
- **OPTIMISM** - Seeing and expecting the future in a positive manner.
- **BELONGINGNESS** - The degree to which members of Team CHS feel accepted.
- **SERVANT LEADERSHIP** – A servant focus on the well-being of the people to which we belong.

Strategic Pillars and Goals

Pillar 1: Student Success

Team CHS supports students in achieving their individual goals and provides a wide range of opportunities for engagement in academic, personal, and professional activities to enhance **knowledge** and community contribution. Team CHS will promote environments, opportunities, and resources designed to **transform** students to reach their full potential. Through engagement with the college and institution, and exposure to **innovative** student-centered approaches, students can thrive, complete their degree, and reach their goals.

1. Recruitment & Retention

Goal 1.1: Recruit, support, and engage students to be successful and to enter their respective undergraduate and graduate programs of study.

Goal 1.2: Increase the retention and engagement of students for a timely progression to degree completion.

2. Student Development and Transformation

Goal 1.3: Develop students' long-term success and ability to become leaders in their communities.

Goal 1.4: Enhance curricular and co-curricular environments to ensure holistic student development.

Goal 1.5: Support students with programs and services that help them discover and better understand career paths.

PILLAR 2: Teaching and Research Excellence

Team CHS (CHS) promotes the advancement of **knowledge and innovation** through a culture of student-centered, **transformational** integrated teaching, research, and creative scholarly activities. Teaching and research are the keystones to advance **knowledge**, foster creativity, inspire **innovation**, and **transform** quality of life. Team CHS will invest in research programs, faculty development, and current technology that enhance the faculty as teacher-scholars and their ability to model best practices for students. As a result, faculty can improve student learning, prepare students to compete in the global marketplace, and **transform** student success by providing access to a complete experiential learning environment that develops students into holistic critical thinkers in the professional community.

GOALS TO ACHIEVE PILLAR 2

1. Teaching

Goal 2.1. Enhance student success through innovative academic programming that promote excellence.

2. Faculty Instructional Support

Goal 2.2. Promote and invest in faculty support services to maximize instructional effectiveness.

3. Foster Belongingness and Collaboration Across CHS Faculty

Goal 2.3 Create opportunities for the mutual exchange of teaching, scholarship, and professional development.

4. Expand Research Opportunities & Infrastructure

Goal 2.4 Develop infrastructure that fosters research and creative scholarly activities of faculty and students.

PILLAR 3: Community Engagement

Build and nurture sustained, mutually beneficial, collaborative partnerships to **transform** quality of life in the community, to share **knowledge** and **innovative** resources and to foster civic and social responsibilities among students, citizens, faculty, and staff.

By deepening strategic relationships, expanding opportunities, and encouraging community members to engage with CHS on multiple levels, the College will distinguish itself as a valued regional partner and critical community resource.

GOALS TO ACHIEVE PILLAR 3

1. Partnerships and Collaborations

Goal 3.1 Develop long-term relationships and build multiple pathways of clear communication and reciprocal engagement with stakeholders.

2. Assessment of Engagement

Goal 3.2: Strategically coordinate, implement, assess, and enhance mutually beneficial engagement efforts related to community stakeholders.

3. Education and Enrichment

Goal 3.3 Increase educational opportunities for citizens across the region.

Admission Policies

1. Students must meet requirements and be admitted by the University before being considered for enrollment in programs within the College of Health Sciences. Specific admission criteria are provided under each of the Health Sciences programs. The student is responsible for obtaining information for the application process including department deadlines.
2. Transfer work must be from an accredited institution and with a minimum grade of "C" in major and supporting courses. The applicant must be eligible to return to the last institution attended.
3. Work taken more than eight years previously must be approved by the Dean of the College.
4. In the event that a student is not accepted for a program, the student who wishes to reapply must submit a new application and related materials that will be considered when a new class is accepted.

Students desiring to complete collegiate work required for admission to professional programs may complete this work at any accredited college or university. Students are urged to carefully plan their course of study to be consistent with the individual program's curriculum progression plan of study. Students who plan to complete coursework before declaring a major in a College of Health Sciences program should consult with the individual program directors or with the College of Health Sciences Advisors.

Students who have not reached a decision on a specific health science major may obtain counseling/guidance from individual program directors in the College of Health Sciences or from College of Health Sciences Advisors.

The programs in the College of Health Sciences are designed to prepare graduates for practice in health and human services professions. Most require licensure and/or certification after graduation and prior to practice. A criminal record (excluding minor traffic violations) may make a person ineligible for licensure or certification in these professions. Students with such a history should contact the licensing or certifying body prior to enrollment to determine whether this might be the case.

Clinical Agency Placement Requirements

Placement in clinical sites for certain programs in the College of Health Sciences requires students to meet specific clinical agency placement requirements. Clinical agency placement requirements for certain programs (particularly those involving direct patient contact and/or practice with children) require a criminal background check and/or a urine drug screen. Students whose results from these screenings do not meet clinical agency placement requirements will be unable to participate in clinical experiences which are required for satisfactory progression and completion of the program. Most clinical agencies and programs where

students may be potentially exposed to blood borne pathogens mandate that students comply with the Hepatitis B vaccination requirement. [see Blood Borne Pathogens and Hepatitis B Statement]. Other requirements may include documentation of tuberculosis screenings indicating student is free of disease, specific immunizations, certifications, licensures, student professional liability insurance purchased through the University [see Student Liability (Malpractice) Insurance], and individual health insurance. Students who have not met clinical agency placement requirements will not be permitted to participate in clinical and laboratory learning experiences mandated for satisfactory progression and completion of the program. Specific requirements for individual programs may be obtained by contacting the departmental office for the program.

Readmission Policies

After being admitted to one of the programs in the College, students who withdraw or who are unable to progress due to being unsuccessful in one or more courses must submit application for readmission according to the guidelines for the specific program. **Readmission to the program is not guaranteed to any student.**

Readmission Appeal Process

The student who has been denied readmission may appeal the decision following these guidelines:

1. Notify the chair of the program's readmission committee of the desire to appeal the decision and to provide additional pertinent information to support the appeal. The committee chair will schedule a time for the student to appear before the committee to present the appeal. A student who has agreed to a time for a meeting of the departmental readmission committee and who does not appear at that meeting may forfeit the right to present evidence beyond that furnished in the original application for readmission.
2. The student will be notified within five working days of the committee's decision.
3. If the student is not satisfied with the decision, the student shall schedule an appointment to present the appeal to the Department Chair. The student will be notified within five working days of the Department Chair's decision.
4. If the student is not satisfied with the decision of the Department Chair, the student shall submit a written appeal to the Dean of the College of Health Sciences. If the Dean determines there are extenuating circumstances surrounding the student's request for readmission and/or if the procedure for readmission has not been followed, a meeting of the College's Readmission Committee will be scheduled. A time will be appointed for the student to appear before the committee to present the appeal. A student who has agreed to a time for a meeting of the College Readmission Committee and who does not appear at that meeting may forfeit the right to present evidence beyond that furnished in the original application for readmission.
5. Decisions of the College Readmission Committee are binding. The student will be notified of the decision within five working days.

Student Agreement Statement

Programs in the College of Health Sciences may require a student to sign an agreement statement that encompasses professional expectations related to the program. This statement is to be signed when the student enters courses in the major.

Student Liability (Malpractice) Insurance

All students whose programs require participation in clinical learning experiences must purchase and maintain liability insurance through the University during the entire clinical experience. Proof of such insurance coverage must be furnished to the department before the clinical experience is scheduled to begin. The University has arranged for appropriate insurance coverage at a modest cost to the student. Further information may be obtained at the student's major departmental office.

Clinical Facilities

The University maintains formal contracts with many health care human services and educational agencies located throughout Kentucky and the United States. Almost every specialty within the entire health care spectrum is available for use in providing high quality experiences for students enrolled in the programs. A list of cooperating agencies is available through the Office of the Dean.

The University is not liable for, nor is there a fund from which payment can be made for those who are inconvenienced or incur expenses based upon canceled classes, assignments, or clinical placements, etc.

Bloodborne Pathogens and Hepatitis B Statement

The College of Health Sciences attempts to minimize the risk of exposure to blood borne pathogens for students who will be involved in clinical and laboratory learning experiences where the risk of exposure could occur. To this end, students majoring in clinical programs within the College of Health Sciences where a potential risk of exposure could occur are required to receive education in universal precautions and the Occupational Safety and Health Administration's (OSHA) Bloodborne Pathogens Standard Regulations. Students will be responsible for complying with the Hepatitis B vaccination requirement when indicated before participation in the clinical training phase of their respective programs. [see Clinical Agency Placement Requirements]. The Blood Borne Pathogens Exposure Control Plan is posted on the College of Health Sciences website and should be carefully reviewed. More information regarding specific program requirements may be obtained through the departmental offices, program student handbooks, and other program informational sources.

Degree Requirements

The students are responsible for selection and registration for courses needed for reasonable progress toward their degree or certificate that will enable the students to satisfy requirements for graduation.

General Academic Information described in Section Five of this *Catalog*, and specific course requirements set forth in the description of curricula, must be met by students completing associate and baccalaureate programs administered by the College of Health Sciences. See programs under each department for major and minor requirements. All first-year

students in the College of Health Sciences must enroll in the Student Success Seminar (HSO 100 Student Success Seminar).

Appeals

Appeals procedures are detailed in the Departmental and University Handbooks and in the department sections.
