

# FORENSIC SCIENCE, BACHELOR OF SCIENCE WITH A CONCENTRATION IN FORENSIC BIOLOGY (B.S.)

The Forensic Science degree program at EKU is a comprehensive science-based undergraduate education that prepares students to become leaders in the forensic science discipline. Forensic analytical work requires patience and diligence, with attention to detail and high-quality standards that will stand up in court. A forensic scientist must be able to communicate effectively, both orally and in writing, have personal integrity and high ethical standards, and have no history of drug abuse or criminal activity. Because the program provides a strong knowledge base and skill set in both molecular biology and analytical chemistry, graduates can also pursue careers in a variety of laboratory settings in industry, academic research labs, environmental work, or pharmaceutical science.

The program offers two options:

1. Forensic Chemistry and
2. Forensic Biology.

The Forensic Chemistry option of the Forensic Science degree prepares analysts to use analytical chemistry to examine evidence in the crime laboratory. Forensic Chemistry graduates will typically work in trace evidence, toxicology, drug identification, or firearm sections of the crime laboratory. The Forensic Biology option of the Forensic Science degree prepares students to work in areas of a forensic laboratory requiring a knowledge of genetics, molecular biology, and analytical chemistry. The forensic biologist applies scientific knowledge and skills to solve complex real-life problems in DNA analysis in support of investigative work. Forensic Biology graduates will typically work in the DNA/serology sections of the forensic laboratory.

## Admission/Progression Criteria

All forensic science majors utilize the regular admission policy of the University for students taking courses offered during the first 60 earned hours of the program. In order to continue in the program after 60 earned hours, the student must maintain an overall earned GPA of 2.50 or better on a 4.0 scale. Students who fail to meet this criterion will be removed from the Forensic Science degree program and placed in the B.S. Chemistry, Chemistry Option, degree program.

## Program Requirements

CIP Code: 40.0510

### Major

- Forensic science majors have a graduation requirement of an overall earned GPA of 2.5/4.0 or better.
- The curriculum below produces a degree that meets the guidelines for accreditation by the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Science (AAFS).
